What is a string inverter?

String inverters are a cornerstone of efficient and reliable solar power systems. Designed to convert the DC electricity generated by solar panels into AC electricity for home use, these inverters are perfect for residential and commercial solar installations.

Which string inverter is best for solar panels?

Designed to convert the DC electricity generated by solar panels into AC electricity for home use, these inverters are perfect for residential and commercial solar installations. Our selection of string inverters, including the Sungrow SG3.0RS, SG4.0RS, SG5.0RS, and SG6.0RS, provides high performance, safety, durability, and ease of installation.

Which inverter is best for a solar PV system?

At National Electrical Wholesalers, we're proud to supply the LIVOLTEK hybrid inverter, a reliable and efficient choice for new solar PV systems. Ideal for homes and small commercial setups, this compact and intelligent bi-directional inverter is designed to support self-consumption with battery storage.
