To further confuse matters, 3GPP terminology often changes with each generation (e.g., a base station is called eNB in 4G and gNB in 5G). We address situations like this by using generic ...

Unlike base stations, which deal with direct communications between mobile devices and towers, Mobile Switching Centers (MSCs) oversee the routing of calls and data ...

Uncover the intricate world of 5G Base Station Architecture, from gNode B to NGAP signaling. Dive into flexible network deployment options.

5G wireless devices communicate via radio waves sent to and received from cellular base stations (also called nodes) using fixed antennas. These devices communicate across specific ...
