By integrating irrigation equipment, control systems, and energy storage, this unit provides an efficient and cost-effective alternative to traditional irrigation stations.

Solar shipping container powers irrigation and tools in off-grid farms. Ideal for remote agriculture needing clean, mobile energy.

Recent pricing trends show standard industrial systems (1-2MWh) starting at \$330,000 and large-scale systems (3-6MWh) from \$600,000, with volume discounts available for enterprise orders.

In a solar-powered irrigation systems (SPIS), electricity is generated by solar photovoltaic (PV) panels and used to operate pumps for the abstraction, lifting and/or distribution of irrigation water.
