As it cut ties with Russia's fossil fuel-dominated power grid, Lithuania took another step towards 100% renewable electricity by launching a large-scale battery storage tender. ...

The money will be available to all energy storage technologies that are directly connected to the transmission network, and winning projects will be selected through a ...

An international tender for the design, manufacture, installation, and technical maintenance services for Lithuania's battery energy storage system has been announced.

The project targets improved safety, greater energy independence and higher return on investment with PV and smart storage. Each Iki store in the pilot is equipped with ...
