---

The University of Ljubljana (UL) will play a role in developing advanced, scalable physics-based models for Battery Management Systems (BMS) at higher TRLs in the upcoming project.

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...

Discover TLS Energy's advanced Battery Energy Storage System (BESS) containers, designed to support renewable energy integration, stabilize power grids, and reduce energy costs.

In Slovenia's capital, Ljubljana has emerged as a hub for advanced lithium battery production. These energy storage systems now power everything from electric vehicles to solar farms, ...
