Mindanao Container Terminal runs entirely on solar power by day. Explore how this innovation leads the way in sustainable logistics!

EcoFlow launches PowerOcean Single-Phase in the Philippines, offering smart, safe, and scalable solar energy storage for Filipino households.

During the day, the terminal operates fully on solar power, while at night, it draws electricity from PrimeRES" supply portfolio, including the Wholesale Electricity Spot Market ...

The Mindanao Container Terminal (MCT) has transitioned to solar power for daytime operations, reinforcing its commitment to sustainability and reducing its carbon footprint.
