Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

Why should you choose energy storage solutions? Whether you're seeking off-grid independence or grid-connected benefits, we provide reliable Energy Storage Solutions that ensure ...

Mauritius isn't just stacking batteries like Lego bricks. Their new energy storage base combines three cutting-edge solutions: Remember those old Nissan Leaf batteries? ...

We have extensive manufacturing experience covering services such as battery enclosures, Energy Storage Cabine, Battery Storage Cabinet, Power Storage Cabinet, Solar Storage ...

If you are seeking a reliable residential or commercial energy storage system in Mauritius or other African countries, please contact GSL ENERGY. We will provide you with ...
