The Solar System is a vast and fascinating collection of celestial bodies, centered around the Sun, which is a medium-sized star. It comprises eight planets, their moons, dwarf ...

Solar system, assemblage consisting of the Sun and those bodies orbiting it: 8 planets with more than 400 known planetary satellites; many asteroids, some with their own ...

Although solar systems are not important to the overall structure of the Universe, the one in which we live is very important from a human perspective, and it will help us to set the scale by which ...

Including the Oort cloud, the size of the Solar System is around 2-4 light years in diameter. Here's a breakdown of the main components: A G2V main-sequence star containing ...
