Will Morocco develop a gas-fired power plant in 2025?

On April 23, 2025, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure for natural gas reception, storage, re-gasification, and transport, alongside a gas-fired power plant.

How can Morocco improve the security of the energy supply?

The Government of Morocco seeks to increase the security of the energy supply by reducing dependence on imports, including increasing the use of renewable sources for electricity production. As of the end of 2023, the share of renewable energy in the electrical capacity mix stood 11.42 GW (ANRE data).

Is Morocco a good country for battery production?

In addition to abundant phosphate reserves, Morocco also possesses metal resources like cobalt and lithium needed for battery production and has cost advantages. Industry estimates suggest that producing lithium batteries in Morocco offers a 36% cost advantage compared to other countries.

Why is Morocco a key hub for LFP production?

Currently, European and American automakers are increasing the use of LFP batteries, making Morocco a key hub for their production. With more Chinese manufacturers accelerating their investments, Morocco is poised to become the largest LFP production base outside China. 02 Market Potential

As the European automotive market accelerates its shift towards electrification, the demand for localized power battery supply is ...

Morocco is quietly positioning itself as a key player in the global electric vehicle (EV) revolution.

As the European automotive market accelerates its shift towards electrification, the demand for localized power battery supply is growing stronger. Local environmental ...

On April 23, 2025, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure ...
