The new keyword in JavaScript can be quite confusing when it is first encountered, as people tend to think that JavaScript is not an object-oriented programming language. What is it? What ...

new Date() new Date(milliseconds) new Date(dateString) new Date(year, month, day [, hour, minute, second, millisecond]) This means that in your constructor, when you pass ...

A new expression is the whole phrase that begins with new. So what do you call just the "new" part of it? If it"s wrong to call that the new operator, then we should not call ...

You should use new when you wish an object to remain in existence until you delete it. If you do not use new then the object will be destroyed when it goes out of scope.
