Why is energy storage important in New Zealand?

Beyond energy storage, the system will provide critical voltage and frequency control, ensuring that the grid remains resilient and capable of handling fluctuations in power supply. This kind of grid support is essential as New Zealand moves away from fossil fuel reliance and integrates more renewable energy sources into its infrastructure.

Why do New Zealand's energy needs need a Contact Energy Bess?

New Zealand's growing energy demands are being driven by increased electrification and population growth, highlighting the need for innovative solutions. The Contact Energy BESS is uniquely positioned to address these challenges.

Why is Contact Energy launching a Bess facility in New Zealand?

"Contact Energy's BESS facility represents a significant step towards a more sustainable and resilient electricity network for New Zealand," says Paul Minchin, New Zealand Location Director. "By integrating BESS technology, we're providing a viable alternative and enhancing the dispatchability of renewable energy sources."

Why do you need energy storage systems?

Our energy storage systems are compatible with storing energy from renewable sources, making them an ideal solution if you want to reduce fuel consumption of a diesel generator, add reliability to a hybrid system or microgrid, or to simply optimise your business case through smart energy management - our solutions are at your service!

The company, a leading manufacturer and service provider of sustainable electrical solutions in New Zealand, offers specialized services for the power industry, including substation design ...

Our fully integrated, plug-and-play battery energy storage solutions (also known as BESS) come in different sizes, from 30 kVA to 1MW, to suit a wide range of industrial and commercial ...

We power New Zealand with locally designed, smart battery solutions -- built to perform in harsh environments and tailored to your project needs. Tailored energy storage solutions for homes, ...

We're providing detailed design and construction support for New Zealand's first grid-scale Battery Energy
