Will New York achieve 6 gigawatts of energy storage by 2030?

Share sensitive information only on official, secure websites. Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the State to achieve a nation-leading six gigawatts of energy storage by 2030, which represents at least 20 percent of the peak electricity load of New York State.

What are New York state's energy storage goals?

Learn more about installed energy storage projects and New York State's progress toward its energy storage goals. New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by 2025 and 3,000 MW by 2030.

How will energy storage affect New York's energy grid?

In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2040. Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage.

What is NYCIDA's largest battery energy storage project?

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households.

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and ...

The pursuit of new energy storage materials is crucial for developing sustainable solutions to modern energy challenges. This comprehensive exploration reveals their ...

Given the potential for advancements in battery technologies, grid integration, and sustainable materials, students pursuing energy storage majors will be well-positioned to play ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...
