How many states have energy storage projects under construction?

The need for energy storage resources continues to be strong across the country, as 31 states currently have energy storage projects under construction.

How is the energy storage industry preparing for a grid-scale energy storage supply chain?

The energy storage industry is making significant progress in laying the groundwork for a domestic battery energy storage supply chain, building or expanding more than 25 manufacturing facilities for grid-scale energy storage. With today's investment commitment, the industry has announced plans to rapidly expand ongoing efforts.

Why is the energy storage industry important?

"The energy storage industry is providing essential power when needed most while boosting domestic manufacturing and creating jobs across the country," said Jason Grumet, CEO of ACP.

In March 2024, Bluetti unveiled the AC180T, a portable power storage system with two 716.8Wh LiFePO2 batteries and a 1800W inverter and rapid charging in less than 1.5 hours. Moreover, ...

The North American energy storage market has experienced explosive growth in recent years, with the United States driving this surge as the region's primary market.

North America's energy storage industry is rapidly evolving, with solar and battery storage solutions becoming a central pillar in the continent's shift toward renewable energy ...

In March 2024, Bluetti unveiled the AC180T, a portable power storage system with two 716.8Wh LiFePO2 batteries and a 1800W inverter and ...
