What's happening in North Macedonia?

CE Report presents an exclusive interview with the Ministry of Energy, Mining and Mineral Resources of North Macedonia, shedding light on the country's dynamic energy transition, strategic renewable energy investments, and regional cooperation efforts.

Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

How is North Macedonia preparing for a green transition?

North Macedonia has made important commitments in its green transition, including the complete phase-out of coal-fired power generation and the deployment of 1.7 gigawatts of renewable energy by 2030, grid and storage investments for energy security and measures to support communities affected by coal transition.

Why does North Macedonia need a 'just transition'?

Years of declining domestic energy production, driven by underinvestment in both new infrastructure and the maintenance of existing assets, left North Macedonia especially susceptible to energy price volatility. The concept of a "just transition" is important for North Macedonia, especially in regions that are heavily dependent on coal.

In any case, interested parties for investing in battery energy storage systems in North Macedonia should continue to closely monitor the developments in the country's energy ...

The continued growth of solar power and the development of storage capabilities will play a decisive role in securing North Macedonia's energy independence and promoting a ...

CE Report presents an exclusive interview with the Ministry of Energy, Mining and Mineral Resources of North Macedonia, shedding light on the country's dynamic energy ...

Battery licensing begins as 60 MW milestone nears, and 4 GW of storage proposals await review.
