Is Ottawa looking at regulatory changes around battery energy storage facilities?

Ottawa is looking at regulatory changes around these types of facilities. (Ross D. Franklin/The Associated Press) UPDATED: City councillors unanimously approved the new rules for battery energy storage facilities at their meeting on Feb. 12, 2025.

What is a lithium-ion battery energy storage system?

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging technology in North America and is planned to be deployed in the City of Ottawa with the Ottawa BESS 2 Project.

Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage use in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

Can a battery facility be built in Ottawa?

According to the new rules, companies looking to build a battery facility will have to show Ottawa Fire Services (OFS) that effective fire and safety risk management has been incorporated into the design. Companies will be required to install fire prevention and suppression systems, and provide OFS with site-specific training.

It features a high-quality container enclosure pre-installed with a battery rack, allowing clients to integrate their own battery packs, cooling systems, fire suppression systems, and other ...

Microgreen solutions provide reliable power and energy storage for off-grid regular loads, grid-support cases and emergency back-up, with ...

A combined solution of solar systems and lithium battery energy storage can provide reliable power support for communication equipment, especially in areas without grid coverage or ...
