In effect, serving as energy storage, pumped-storage hydro can help balance fluctuations in supply and demand and support the grid, especially in periods when there is ...

Solar panels produce peak energy during midday sunshine, while wind turbines generate maximum output during specific weather patterns. Pumped-storage facilities capture ...

The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future.

ACEN aims to integrate renewable energy better and further enhance grid reliability through its pioneering battery storage projects in the Philippines and overseas markets.
