In this article are therefore presented different kinds of heat pump systems for heating and cooling of buildings (with a focus on air and ground heat pumps) that have integrated thermal energy ...

Imagine if we could store excess solar energy from summer months for winter use. The latest closed-loop pumped storage systems achieve 80-85% round-trip efficiency - comparable to ...

We provide a comprehensive product offer for photovoltaic installations.

For installations before July 31, 2024, there is no requirement for energy storage or hot water systems to qualify for funding. However, systems installed after this date must include energy ...
