---

Battery energy storage is widely used in power generation, transmission, distribution and utilization of power system [5]. In recent years, the use of large-scale energy ...

Under the background of "dual-carbon" strategy, China is actively constructing a new type of power system mainly based on renewable energy, and large-scale ener

Currently the storage inflow/outflow power is distributed equally among containers. The existing power allocation and control strategy in battery energy storage stations mainly ...

Therefore, this paper proposes a coordinated variable-power control strategy for multiple battery energy storage stations (BESSs), improving the performance of peak shaving.
