Does Latvia have an electricity grid?

Synchronization of the Baltic states with the European electricity grids and desynchronization from the Russian unified energy system. The electricity grid in Latvia, however, is primarily managed by Sadales tīkls, the largest distribution system operator that serves 99% of the country's territory.

How can Latvia improve energy security?

To enhance energy security, the Latvian government has allocated EUR134.4 million through the REPowerEU Recovery Fund for energy investments, with EUR1.5 million dedicated to establishing the country's first regional biomethane injection point in Džukste.

Are battery energy storage systems a growing demand?

A growing demand in the energy market for battery energy storage system (BESS) technologies is developing currently, and the trend is expected to remain stable in the future.

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these technologies is being ...

As of 2025, Latvia's energy storage capacity has grown 300% since 2020, with Riga leading this charge [8]. This isn't just about keeping smartphones charged; it's about rewriting Europe's ...

The Turkish government plans to begin approving energy storage projects in the middle of 2023, which should support the Turkish grid in the wake of growing solar photovoltaic (PV) capacity.

Amsterdam, January 12, 2024 - GIGA Storage is pleased to announce the development of the Green Turtle project, a groundbreaking energy storage project with 600 MW of power and ...
