In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

The integrated containerized photovoltaic inverter station centralizes the key equipment required for grid-connected solar power systems -- including AC/DC distribution, inverters, monitoring, ...

BoxPower's flagship SolarContainer is a fully integrated microgrid-in-a-box that combines solar PV, battery storage, and intelligent inverters, with optional backup generation.
