The element missing from Serbia's energy landscape--the one that will ultimately determine the success of the renewable transition--is large-scale energy storage. Batteries ...

A gigawatt-scale factory producing lithium iron phosphate (LFP) batteries for the transport and stationary energy storage sectors could be built in Serbia, the first of its kind in Europe.

The Republic of Serbia could be a technological leader in LFP battery production in the whole world outside of China, because it has a chance ...

Investments in battery energy storage systems (BESS) is ramping up around the world and Serbia is now making its first steps.
