---

According to IRENA, global sodium-ion battery production capacity is expected to reach 70 GWh per year by 2025 and could grow ...

We compare projected sodium-ion and lithium-ion price trends across over 6,000 scenarios while varying Na-ion technology development roadmaps, supply chain scenarios, ...

Sodium-ion batteries (SIBs) are emerging as a scalable, cost-effective alternative to lithium-based technologies for large-scale energy storage. However, a systematic, data ...

What is happening in the world of Sodium Ion batteries in 2025? Are they emerging to replace Li-Ion? The benefits are low cost & high cycle life.
