Explore Hakai's deployable container systems on Vancouver Island for reliable power generation and communication in remote areas. Tailored for easy setup.

By combining solar and wind energy, the system aims to optimize power generation and distribution, ensuring a stable and sustainable energy supply for the community.

The Intech Energy Container -- or ECON -- is a modular, pre-configured off-grid power solution. It combines solar PV, battery storage, inverters, and energy management in a rugged container.

In the report, the communication and control system architecture models to enable distributed solar PV to be integrated into the future smart grid environment were reviewed.
