---

Like solar panels used to generate electricity, solar lights use photovoltaic technology. They can be used for a variety of indoor and outdoor purposes, from lighting ...

To wrap it up: solar energy is the full spectrum of the sun's output, while light energy is just the visible part of that spectrum. They're closely connected, but not identical.

Just like milk and cookies, solar power and LED lighting are a perfect combination. They work well with each other while complementing their best attributes to create a solution that is both ...

**CAN I USE REGULAR LIGHT BULBS IN SOLAR LIGHT FIXTURES?** Using conventional light bulbs in solar light fixtures is not recommended, as these fixtures are ...
