So, how can we optimise our solar efficiency and mitigate the impact of season changes on our systems? Some practical changes include shifting your loads to sunlight hours ...

With winter bringing shorter days and lower sun angles, some of our customers - especially new solar owners being their first winter - have questions about solar panel ...

South African winters are often crisp, clear, and full of sunlight, which are ideal conditions for solar panels - or so it seems. But as many solar users are discovering, blue ...

Although South Africa gets copious amounts of sunshine for much of the year, it is not immune to the impact of winter on solar power efficiency. During this period, the Earth's Southern...
