---

Solar PV is rapidly growing and currently it is already the second largest source of renewable electricity in Switzerland after hydropower. In 2022, solar PV accounted for 7% of the national ...

Typically, solar panels in Switzerland are mounted on existing infrastructure like mountain huts, ski lifts, and dams, with larger-scale installations in the Alps remaining rare.

Construction is nearly complete on an innovative, multi-family house in canton Zurich that can collect and store enough solar power to fulfil the energy needs of its tenants.

The planners wanted to create a residential building that supplies its residents with their own solar energy around the clock, not only for electricity, but also for heat and e-mobility.
