PV capacity will likely decline further from 2022 to 2023. Higher interest rates have created obstacles for financing projects, as have reductions in feed-in tariffs and other policies ...

South Korea's government is planning for 100MW of battery storage as part of a nearly 3GW hub of solar PV and wind on reclaimed land in Saemangeum, which is an estuarine tidal flat on the ...

The Moon administration's 2030 target - 33.6GW new solar capacity - includes a 15% tax credit for mobile projects until 2026. Pair this with Samsung SDI's new 314Wh/kg lithium batteries ...

South Korea is ramping up its battery energy storage deployment with a new 540MW tender to stabilize the grid and support ...
