The Ceylon Electricity Board (CEB) has requested proposals for a standalone battery energy storage system initiative. The purpose of the facility is energy shifting and the ...

In the project proposal for the pumped storage power plants (PSPPs), the CEB said that Sri Lanka's energy sector faces the critical ...

BESS stores this excess energy during low-demand daytime hours and releases it during peak demand periods, reducing dependence on costly and less efficient power plants.

For critical infrastructure like hospitals, telecom stations, and ports, Sri Lanka is also investing in emergency power protection systems. These facilities now rely on durable, ...
