---

In December 1901 Marconi set up his receiving station on Signal Hill, in an abandoned TB isolation hospital (this building has long since been torn down) on the eastern part of the hill. ...

The Poldhu station's new antenna system was much simpler than the original. While not as powerful, they hoped it would be strong enough to ...

A signal station was established in Cabot Tower during the Second World War; using a combination of wireless and visual signals as ...

The visitor centre is open during the tourist season and features interactive exhibits, a film about the site's military and communications history, and the history of St. John's, along with a cafe.
