---

Learn how to balance LiFePO<sub>4</sub> battery cells manually or with a balancer to improve battery pack performance, safety, and lifespan.

This paper proposes a new balancing approach based on the battery state of charge (SOC) to equalize the cells in the LiFePO<sub>4</sub> battery pack in charging process. The hybrid ...

In this work, a finite-state machine-based control design is proposed for lithium iron phosphate (LFP) battery cells in series to ...

To validate the efficacy of the novel SoP -based cell equalization algorithm, a simulation is conducted in which a Li-ion battery ...
