-----

High-Purity Activated Carbon for Supercapacitors: Designed to enhance energy storage efficiency with a 99.99% purity grade, ensuring superior electrical conductivity and surface area for rapid ...

This product is specifically designed for use in the electrodes of supercapacitors, offering excellent performance with a high specific surface area, high capacitance, and high energy density.

This report is a detailed and comprehensive analysis of the world market for Supercapacitor Activated Carbon and provides market size (US\$ million) and Year-over-Year (YoY) Growth, ...

AB520Y is active carbon powder with extra high surface areas for preparing electrodes of a supercapacitor  
Packing: 70g per bag packed in a vacuum plastic bag
