Researchers are hoping that a new, low-cost battery which holds four times the energy capacity of lithium-ion batteries and is far ...

An Australian developer of lightweight batteries has been awarded funding to kick-start the nation's production of lithium-sulfur batteries.

A surge in investment in large batteries is helping to safeguard Australia's energy future but experts say the trend could be threatened by a change in policy.

Researchers are hoping that a new, low-cost battery which holds four times the energy capacity of lithium-ion batteries and is far cheaper to produce will significantly reduce ...
