In the U.S., federal law requires, with certain exceptions, used nickel cadmium (Ni-Cd) and small sealed lead acid (Pb) batteries to be ...

Most batteries contain sulfuric acid, an EHS, and then some non-EHSs. The facility must evaluate if sulfuric acid should be reported ...

At a temperature of 55°C (131°F), the battery must not contain any unabsorbed free-flowing liquid, and must be designed so that electrolyte will not flow from a ruptured or cracked case.

This guidance applies to individuals working with the recharging, replacement, and disposal of communications, electronic, and lead acid batteries aboard MCLB Barstow.
