This guide breaks down how to wake up a lithium battery safely, how to determine whether it's actually in sleep mode or permanently damaged, ...

We'll guide you through the process of reactivating a completely dead battery and explain why it's not the battery's fault, but rather a charger-related problem. The problem is some chargers...

Perform a full system power cycle. If no changes have been made to the PLM channels for the battery, and it still fails to communicate, it is recommended to contact a certified PWRcell ...

Strangely, this solved the issue - PC doesn't wake up during power outage and I can put it to sleep even when the UPS is on battery power. But now I can't use my keyboard to ...
