From anti-reflection to color tints, modern glass enhances design in many ways. Whatever the construction challenge, we have the glass to help ...

Unlike virgin batch materials (silica sand, soda ash, and limestone), cullet has already undergone the energy-intensive chemical reactions required to form glass.

Discover how solar glass differs from normal glass and understand the different types of solar glass used in solar panels in this blog.

Incorporating cullet into production reduces energy consumption because recycled glass melts at a lower temperature than raw materials. It also reduces the need for mining new ...
