---

We conducted an in-depth study on the correlation between the glass samples' thermal properties and the interface contact, revealing how the glass composition ratio affects ...

The addition of ZnO into the glass may aggravate the erosion to Si and decrease the glass phase conductivity. It is inferred that increasing Bi<sub>2</sub>O<sub>3</sub> and SiO<sub>2</sub> or reducing ZnO can improve the ...

We conducted an in-depth study on the correlation between the glass samples' thermal properties and the interface contact, revealing ...

Here, we review the current research to create environmentally friendly glasses and to add new features to the cover glass used in silicon solar panels, such as anti-reflection, self-cleaning, ...
