In this article, a novel control method of the grid-connected inverter (GCI) based on the off-policy integral reinforcement learning (IRL) method is presented to solve two-stage ...

This article proposes a unified control for such inverters with current control, voltage control, and power control loops, including the PLL impact on a b c - d q transformations as ...

Three different strategies may reduce the switching losses. The first strategy is to reduce the transistor current or the voltage across the transistor (collector-emitter) is close to ...

Following the aforementioned analysis, this study will apply the SMC technique into the proposed control system for a three-phase multilevel UPS inverter. The proposed control ...
