The development of self-healing calcium-titanium ore (perovskite) solar cells marks a major milestone in the evolution of renewable energy. By combining high efficiency, low cost, and ...

Nanostructured TiO₂ coatings not only minimize reflection through the graded transition of the refractive index but simultaneously improve the device's ability to self-clean ...

Calcium and magnesium titanates synthesis was successfully achieved using concentrated solar energy in a static experiment. There are different routes to prepare the ...

A standardized model is presented for evaluating the efficiency of spectral converters integrated into PV glass, systematically ...
