July 22, 2025, Comrat - Construction on the Vulcanesti-Chisinau high-voltage power line is taking shape. More than half of the necessary towers have already been erected, and the first ...

An uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails.

The works for the construction of the foundations of the 330 kV and 400 kV equipment for the power autotransformer are underway at the Chisinau Power Station.

Ongoing interconnection projects, such as the 400 kV Vulcanesti-Chisinau and Balti-Suceava lines, will improve the situation, but they will not be completed by the end of ...
