-----  
What is et industrial network uninterruptible power supply (UPS)?

ET Industrial Network Uninterruptible Power Supply (UPS) SPECIFICATIONS The Uninterruptible Power Supply (UPS) shall be powered by 24VDC (nominal) input and provide 24VDC (nominal) output at 100 Watts (max.) for a duration of 1.0 minutes, typ. Ultracapacitors shall be employed for energy st

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

What are the components of an UPS system?

The UPS system shall consist of, as required by the project, the UPS module, battery cabinet(s), maintenance bypass and other features as described in this specification. One integrated system bypass module (ISBM) including a static bypass and associated control and monitor panel, and one or more internal Power Modules.

How many power modules can be paralleled?

A total of 10 Power Modules in 2 to 4 UPS frames shall be capable of parallel operation, either for capacity or redundant systems. It shall be possible to parallel up to four (4) UPS units where each UPS contains a discrete static switch, and without a central static switch/bypass cabinet.

Supply your system reliably with our solutions for uninterruptible power supply. Select the appropriate power supply, uninterruptible power ...

The UPS Module Control power supply employs a redundant design configuration, utilizing the UPS AC input (utility), Bypass input and the UPS Module inverter output, therefore enhancing ...

Explore smart power supply solutions with uninterruptible power supply (UPS) systems, including modular and integrated UPS, ensuring reliable backup power for data centers.

ET Industrial Network Uninterruptible Power Supply (UPS) SPECIFICATIONS The Uninterruptible Power Supply (UPS) shall be powered by 24VDC (nominal) input and provide 24VDC ...
