What is the UWB-XG unifi WiFi basestation XG?

The UWB-XG UniFi WiFi BaseStation XG delivers unprecedented wireless awareness and security, including tools for real-time spectrum monitoring, airtime utilization analytics, and intrusion detection/prevention.

Is UWB a good option for indoor applications?

As positioning technology advances, the popularity of Ultra-Wideband (UWB) positioning in indoor applications continues to grow. However, UWB faces many challenges in outdoor environments, such as issues with base station deployment, as well as the impact of ping-pong effects and multipath effects in indoor-outdoor transition zones.

How do I mount the unifi WiFi basestation XG?

The UniFi WiFi BaseStation XG can be easily mounted on a pole or wall with the included brackets. VESA Mounting Its VESA mount compatibility allows easy integration with the VESA MIS-D standard and can be used with mounts that comply with this standard. 75 mm 100 mm Weather-Resistant Form Factor

What is a UNIFI basestation XG?

Features Powerful Hardware The UniFi WiFi BaseStation XG features the latest in Wi-Fi 802.11ac Wave 2 MU-MIMO technology combined with dedicated security and Bluetooth radios. Intuitive UniFi Controller Software The system integrator can leverage the controller to easily configure and administer an enterprise Wi-Fi network. Expandable

The system's positioning performance is assessed via various sets of trajectory experiments, demonstrating that the suggested UWB/GNSS/IMU multi-sensor fusion ...

Tri-radio WiFi 5 AP with 12 spatial streams and a selectable beamforming antenna, designed for high-density applications at large venues.

Product Overview IEEE 802.15.4a positioning base station, can support ToF/TDoA two kinds of positioning methods. It is mainly used in long-distance, high-precision positioning. The device ...

However, current approaches frequently depend on rigid body models, which require multiple base stations and lead to substantial ...
