---

A government-funded district heating system is taking waste heat from Interxion's Vienna data center campus, to the neighboring ...

Imagine storing energy as simply as filling a balloon with air--sounds almost too easy, right? That's essentially what Vienna's compressed air energy storage (CAES) project ...

This project addressed the question of whether and how hospital utility systems can be used for electrical energy balancing.

This project lays the groundwork for further integration of thermal storage across the district cooling network. It also reflects broader European efforts to reduce urban heat stress while ...
