SEMISTACK RE is a pre-qualified water-cooled power assembly for megawatt inverters, optimized for wind turbines with high IGBT cycling and long capacitor life.

Liquid-cooled AC drives can be used in many combinations, from a single dedicated frequency converter to large-scale common DC bus systems. Packed with features, these fully ...

With quiet performance, marine approvals, and modular scalability, ABB's liquid-cooled drives are built for uptime and long-term value.

Four-wheel drive battery electric vehicles (4WD BEVs) faces issues due to complex water cooling system of the standard silicon based inverter systems for the rear and front ...
