Is Belize a good place to invest in energy?

Belize's energy sector is looking to expand in biomass and small-scale solar, as well as create new opportunities in electric vehicles, large-scale solar, liquefied natural gas (LNG), and waste-to-energy. However, Belize remains a net-importer of electricity from Mexico, which makes energy imports expensive and unpredictable.

What is the primary source of energy in Belize?

In Belize, almost half the energy comes from hydroelectric power and biomass. The rest is produced by domestic independent power producers (IPPs) and a Mexican utility, with IPPs contributing about 55.6% of the country's electrical needs.

What are the renewable energy resources in Belize?

Belize has good to moderate land-based wind resources (Class 3-4). Full solar and biomass resource assessments are unavailable. The country's current hydroelectric capacity includes 25.5 MW at the Mollejon Hydro Plant, 7.0 MW at the Chalillo Hydroelectric Dam Plant, 19 MW at the Vaca Hydroelectric Facilities, and 3.5 MW at the HydroMaya Dam.

Does Belize use solar power?

Belize uses solar power on a smaller scale, with the Government having installed solar micro-grids and solar-powered streetlights in rural communities not yet connected to the national grid. The Government of Belize, along with Belize Electricity Limited (BEL), intends to launch a pilot project introducing electric vehicles.

The Belize Energy Resilience and Sustainability Project helps address energy challenges by installing modern battery storage systems at four critical locations.

Turtle Beach Island Resort in Belize will switch from a diesel backup generation to a battery-powered clean energy system. The On.Energy Battery Energy Storage System ...

That's thanks to a major leap toward energy independence: Belize's first utility-scale solar power plant is officially in the works, which ...

The project will install four 10-megawatt battery systems in key districts--San Pedro, Dangriga, Orange Walk, and Belize District--giving Belize the ability to manage its ...
