---

You need solar panels, inverters, racking equipment, and performance monitoring equipment to go solar. You also might want an energy storage system (aka solar battery), ...

There are three main types of residential solar panel installations: grid-tied, hybrid, and off-grid. Grid-tied systems are the most common and the cheapest because they use the least amount ...

From photovoltaic (PV) panels to inverters and batteries, these components form the backbone of any solar power system. This blog explores the various types of solar energy equipment, their ...

**Inverters:** Inverters convert the direct current (DC) produced by solar panels into alternating current (AC), which is used by most household appliances. **Batteries:** Batteries ...
