---

Generally, a BMS measures bidirectional battery pack current both in charging mode and discharging mode. A method called Coulomb counting uses these measured ...

When choosing a BMS for a lithium-ion battery, the most important aspect to consider is the maximum current rating of the BMS. In addition to that, you need to make sure ...

In this article, we will examine a circuit that allows charging Li-ion cells connected in series while also balancing them during the charging process. This BMS circuit diagram is ...

About this item [Discharge and charge current]: BMS supports up to 60 amp continuous discharge or 30A charge current. Perfect for your high current applications. ...
