-----

Not only do you have to check the power your car can generate, all the wiring between the generation and the plug (incl. the plug itself) have to be rated for that power as well.

How many MPPTs does a solar power inverter have?Featuring 4 integrated MPPTs with a string current capacity of up to 20A, this inverter maximizes energy harvesting and system efficiency.

The standard Toyota Prado power outlets are only rated to 120 watts (for all power outlets in the car) -- the Waeco PerfectPower inverter can put out 150 watts continuous power.

For those who are not electrical minded, check how many watts the intended device is rated at and dont connect anything that is over the rating of your inverter.
