Transmittance: Around 91-93% of sunlight passes through--enough to keep efficiency high. Weight: Adds about 10-15kg to a standard 60-cell panel, manageable for ...

The VLT indicates the percentage of visible light that passes through glazing. It ranges from 0 to 1 (or 0% to 100%), with higher values meaning more natural light enters the ...

The light transmittance (TL) expresses the amount of light transmitted through the glass. It is the percentage of light, visible to our eyes, that the glass of a fixture allows to filter ...

The transmittance of conventional uncoated solar glass at a vertical incidence of light is approximately 91%. The front reflects around 4%, around 4% on the back, and 1% ...
