Double glass modules use an innovative design with glass on both sides, offering higher photovoltaic conversion efficiency and better environmental characteristics.

While conventional solar panels feature a single layer of protective glass, double-glass panels utilize two layers, encapsulating photovoltaic cells in a manner that enhances ...

Utilizing the latest advances in lapping and polishing technology, our double-sided polishing processes have been specially developed to allow us to provide the best possible outcomes ...

Bifacial solar panels take in sunlight from both sides. This helps them make 5% to 30% more energy than regular panels. Double ...
