What is a Bess battery energy storage system?

Custom-engineered BESS solutions that help Class A energy users reduce Global Adjustment charges, protect critical operations, and build long-term energy resilience. Battery Energy Storage Systems address the most critical energy challenges facing Ontario manufacturers today

What is a Bess installation?

A BESS installation can support these facilities by conditioning power to smooth out voltage dips and surges, protecting sensitive equipment and maintaining consistent output quality. It also enables load shifting and energy optimization, laying the groundwork for integrating solar or other on-site generation systems.

What is a Bess project?

Pioneered and initiated several BESS portfolios in Canada. Develops most of Alberta's utility-scale BESS projects. Sturgeon Storage Project is a 23-megawatt lithium-ion battery energy storage system that will be independently connected to Alberta Connected Power System (AIES) and scheduled by Alberta Electric System Operator (AESO).

What is a Bess facility?

BESS facilities are designed with safety in mind and ensure communities stay safe. These facilities include: Design and installation to meet the National Fire Protection Association's (NFPA) standards for fire prevention, detection, and response in energy storage systems and extensive training for local fire departments and emergency services.

The Bulwer Station Battery Energy Storage System project was completed in 2020. Toronto Hydro is also one of eight electrical utilities in Canada to have earned the prestigious ...

Explore TROES" modular BESS solutions built for Canada. 300+ configurations, local support, and eligible for BC Hydro & federal energy incentives.

Browse our products and documents for Battery Energy Storage System (BESS) - An all-in-one Battery Energy Storage System.

MCBC Toronto Battery Project provides up to 200 MW of clean energy storage to boost grid reliability and support Indigenous partnerships.
